

## Lone Star Family Farms Visits John Deere

The Crownover family made a two day visit to John Deere's manufacturing facilities in Waterloo and Des Moines, Iowa in February. One day was spent at the tractor factory in Waterloo with our local John Deere salesman from Hansford Implement for a Gold Key visit.

A Gold Key visit entails a 3 to 5-hour factory visit touring the assembly production lines of John Deere's equipment. In addition to the tractor factory, the family also toured the manufacturing facilities in Waterloo that make gears and engines.

The second day was spent touring the Spray Rig/Cotton Stripper and Picker factory and a visit to John Deere Credit headquarters in Des Moines. This visit was very educational to the entire family in seeing John Deere equipment made from start to finish and also seeing the latest technologies that John Deere continues to develop as they pave the way with in agriculture equipment.
